

Milann launches new fertility centre in Mumbai

FOR IMMEDIATE RELEASE

Mumbai, Jan 16, 2017: Milann recently announced the launch of its new centre in Mumbai. The Mumbai facility in Bandra offers all services related to women's health and fertility care including fertility counselling, ultrasound monitoring, male and female fertility evaluation, endoscopy, andrology services, IUI, IVF, ICSI as well as donor and surrogacy programs.

A study done at Milann on the incidence of infertility showed that a rising number of couples suffer from problems ranging from menstrual disturbances, obesity, lack of libido, etc. especially in metropolitan cities. They all contribute to infertility. Besides pathological reasons there could be other reasons such as late marriage, decision to postpone child bearing, work pressure including taking work home at the cost of personal time, high pace of life, unhealthy sexual life, lack of exercise and sleep etc. This has become a co-morbid situation in most metros across India.

With a state-of-the-art IVF lab and highly skilled clinicians, this center promises to be one of the best fertility centers in India. Spread across India with centres in Bangalore, Delhi, Chandigarh and now Mumbai, Milann plans to expand its footprint across the country with its evidence-based approach and its 28 year old legacy in reproductive medicine.

About Milann

Milann - The Fertility Center has been helping couples turn hope into happiness for over 25 years. Over 70,000 couples have been helped since Milann was founded in Bangalore by Dr. Kamini Rao, a pioneer in reproductive medicine in India in 1989. Milann has been ranked 1 by Times Health in Fertility Sciences specialty.
